Diabetes Management in the General Care Setting

Course Code: 80807ACT

Target Group:

This course has been developed by the National Association of Diabetes Centres (NADC) to provide health care professionals and nurses in general practice with contemporary clinical knowledge, practical guidelines and practice principles of diabetes management.

NADC is a joint venture between the Australian Diabetes Society and the Australian Diabetes Educators Association.

Lecture and Demonstration

This course is particularly relevant to Practice Nurses, Emergency Nurses, Community, Regional, Rural & Remote Nurses, Aged Care Nurses and Indigenous Healthcare Workers.

Course Delivery

Total Hours of Learning - approx. 80 hours.

The course is provided as a fully online e-learning course via the APNA website or can be delivered as a three (3) day workshop including demonstration and practical assessment.

Completing a course with The Benchmarque Group guarantees:

- A Nationally Accredited Course
- A Nationally Recognised Qualification
- Delivery by a Credentialed Diabetes Educator
