TERMS AND CONDITIONS	<p>Visit benchmarkgroup.com.au/terms-and-conditions View Student Handbook</p>

Course outline

The Course in Ear Health Assessment aims to provide students with the knowledge to perform ear health examinations and hearing health evaluations. Students will learn the fundamentals of performing otoscopy, tympanometry, and the theoretical components of audiometric screening, whilst also understanding the associated risks and complications.

Course outcome

Upon successful completion of the course, students should have the ability to:

- Understand the anatomy and physiology of the auditory system
- Perform a comprehensive ear health examination
- Identify contraindications to proceed with hearing assessment
- Perform otoscopy
- Perform tympanometry
- Understand the results post otoscopy assessment and tympanometry screening
- Recognise ear abnormalities
- Recognise the need to refer to a specialist
- Provide a patient with a comprehensive explanation of the examination findings
- Document the examination findings and outcome in the patient's history
- Perform a paediatric ear health assessment
- Perform a paediatric balance, and speech assessment
- Accurately identify a range of conditions of the auditory system
- Apply a broad knowledge of strategies to manage a range of middle ear conditions
- Provide client-centred education to support health promotion
- Outline any follow-up required and make appropriate specialist referrals as needed.

Course content

The three-day face-to-face workshop incorporates all components required to complete a safe and effective ear health assessment. You will feel confident performing otoscopy, tympanometry, and demonstrate the theoretical components of audiometric screening as well as identify common ear health conditions.
