Course outline

The Chronic Disease Care Planning Course aims to provide students with the skills and knowledge necessary to determine the support needed for chronic disease management, including person-centric care, engaging the client, identifying and managing risk factors, and contributing to a multi-disciplinary service approach within the care planning model.

The course is supported by funding from the Australian Government Department of Health under the Chronic Disease Support Project.

Course outcome

Upon successful completion of the course students should have the ability to:

- Determine the persons chronic disease management needs, identify risk factors, understand engagement
- Support the person in behaviour change, recognise the need for referrals, recognise the need for followup and review
- Apply effective care planning techniques to support the management process.

Course content

The face to face workshop involves lecture and practical workshop activities around the application of chronic disease care planning in primary health care

Course structure

To achieve competency students must demonstrate successful completion of:

- Case studies, scenarios and oral questioning in the classroom
- Care planning Students will be deemed competent on successful completion of all activities within the workshop, including the completion of 3 care plans.

Entry requirements

Entrants to the Chronic Disease Care Planning course must provide evidence of a relevant professional role.

Relevant roles would include:

- Aboriginal and/or Torres Strait Islander Health Workers or Practitioners
- Registered Nurses
- Enrolled Nurses
- General Practitioners
- General Practice Registrars
- Allied Health Workers
- Social and Emotional Wellbeing Workers
- Others on request.

Students must complete the Foundations of Chronic Disease prior to entry to this course.

About accessIQ
