Tympanometry

COURSE INFORMATION

Course snapshot

COURSE TITLE	Tympanometry
VALUE FOR ORGANISATIONS	Create an understanding of middle ear function with Tympanometry, and use this course to understand otoscopy, mechanics of the ear canal, the impact on acoustics, and bone conduction capability via air pressure testing. With tympanometry readings, being able to interpret and document results, and an understanding of ear function, expands knowledge that can help to support the diagnosis of treatable conditions and diseases.
COST	\$450
DELIVERY & ASSESSMENT	<p>Full day face-to-face workshop.</p> <p>The face-to-face workshop involves lecture and practical workshop.</p> <p>The workshop session consists of an anatomy refresher, principles of Tympanometry, Tympanometry testing and results comprehension. Students work with peers in the classroom to conduct simulated examinations as part of the practical skills activities.</p>
ESTIMATED HOURS OF STUDY	8 hours of active learning.
CPD HOURS	As a general guide, one (1) hour of active learning equates to one (1) hour of CPD. It is the responsibility of the individual student to calculate how many hours of active learning have been completed. The hours of active learning estimated above should act as a guide to CPD hours.
ENTRY REQUIREMENTS	To view entry requirements please refer to the next page.
TERMS AND CONDITIONS	Visit benchmarkgroup.com.au/terms-and-conditions View Student Handbook

Course summary

This course is designed for healthcare professionals with ear health experience to fine-tune their tympanometry skills for completing patient assessments.

Students of this course will learn to perform tympanometry point-of-care testing to provide a more detailed assessment of middle ear health (especially in children).

Tympanometry is a test that measures the function and movement of the eardrum and middle ear. The results of tympanometry are represented on a graph called a tympanogram. Tympanometry is not a hearing test but a measure of energy transmission through the middle ear.

In the Tympanometry training course, you will develop and enhance your knowledge and tympanometry skills when performing simple ear health assessments. You will revise the ear's anatomy and physiology, perform otoscopy, and practice your tympanometry skills safely and effectively.

Course outcome

Your practical skills workshop provides an engaging setting to enable meaningful learning and offers opportunities to practice your newly learnt skills. At the end of your workshop, you should have the ability to:

- Revise the anatomy and physiology of the ear
- Refresh otoscopy skills
- Understanding the theoretical components of tympanometry
- Perform tympanometry safely and effectively
- Interpret, report and document tympanometry readings.

Course content

The workshop session consists of an anatomy refresher, principles of Tympanometry, Tympanometry testing and results comprehension. Students work with peers in the classroom to conduct simulated examinations as part of the practical skills activities.

Entry requirements

Entrants should have a minimum of six months' employment or experience working with clients in a clinical environment. High language, literacy, and numeracy levels – sufficient to interpret medical documents/referrals/requests and write medical notes and reports.

- Aboriginal and/or Torres Strait Islander Health Practitioners
- Aboriginal and/or Torres Strait Islander Health Workers
- Allied Health Professionals
- Audiologists
- Audiology Assistants
- Enrolled Nurses
- Midwives
- Nurse Practitioners
- Paramedics
- Registered Nurses

About accessIQ

We are paving the way for innovative and easy online learning through our bespoke online course and assessment platform, accessIQ.

About Benchmark Group

Benchmark Group is a Registered Training Organisation (RTO 21824) delivering a range of clinical skills courses to meet the needs of a broad range of health professionals across Australia.

As an RTO working in the health sector, our focus is on the delivery of courses designed to provide healthcare professionals with the opportunity to expand their skills and careers. We concentrate on skills and knowledge that can be immediately implemented in a vocational context.

Skills learnt today can be used tomorrow.
