

2025 PROGRAM

Immunisation Professional Development Conference

Come and join us for our 2025 Immunisation Professional Development Conference (IPDC)

Wominjeka, bujari gamaruwwa,

Our goal at Benchmarque Group is to support primary healthcare professionals in developing and building careers for the future. Our courses help clinicians become qualified and confident in operating at the top end of their scope of practice, and students have access to our group of highly skilled and specialised trainers still working in industry.

We also know that our learning model is practical and brings community-based clinicians together to learn, connect, and grow.

We are a well respected and well established organisation with 16 years of industry experience, knowledge and relationships. We are proud to partner with Commonwealth and Jurisdictional Health agencies, private sector institutions, Aboriginal Community Controlled Health Organisations and peak bodies, Primary Healthcare Networks and directly with Healthcare Providers.

We have a voice in the industry and are ultimately working in partnership to improve healthcare for all Australians, particularly in priority populations. A significant proportion of our work is helping to build real education solutions that achieve health and life expectancy equality for Aboriginal and/or Torres Strait Islander peoples.

After a successful event in 2024, the team and I are proud to be hosting our second event, and we'd love for you to join us in Eora (Sydney) or Naarm (Melbourne).

Drew, CEO Benchmarque Group.

IPDC 2025 will feature:

Leading
Australian clinical
experts

Up-to-date
research in the area
of immunisation

Practical
workshops

Breakfast
plenary
opportunities

Social networking
events

Rural and remote
student sponsorship
opportunities

Why immunisation?

We have rapidly become the 'go to' organisation for Immunisation training and ongoing education to maintain currency for Nurses, Midwives and Aboriginal and Torres Strait Islander Health Practitioners nationally. While Immunisation client safety is critical, at Benchmark Group, a core focus is practitioner safety.

Ultimately, we know that immunisations have been, and remain, a simple, timely, effective, and affordable way to improve health and deliver positive outcomes for people of all ages.

Since 2020 we have upskilled close to

5,000

 students as Immunisation Providers

Why attend?

Why should you attend our 2025 Immunisation Professional Development Conference?

The event's purpose is to deliver a blend of hands-on skills-based workshops and updates from experts in the field.

Content will include catch-up vaccinations, vaccine hesitancy, travel vaccinations, priority populations and an update on winter respiratory conditions in advance of the 2025 season.

Location	Dates	Expected attendees
Novotel Sydney Airport 22 Levey St, Wolli Creek, NSW 2205, Gadigal Country	Wednesday 30 April - Thursday 1 May 2025	120
Mercure Melbourne Doncaster 6 Tower St, Doncaster VIC 3108, Wurrundjeri Country	Wednesday 14 May - Thursday 15 May 2025	120

Enjoy the unique opportunity to contribute to the ongoing professional development of over 240 healthcare professionals. Please contact us to register your interest in sponsorship.

Breakthroughs that change patients' lives™

Throughout Pfizer's 170 year history, and over 60 years in Australia, we have remained dedicated to discovering and developing new and better ways to prevent and treat disease, and improve the health and wellbeing of people around the world.

At Pfizer, we apply science and our global resources to improve health and well-being at every stage of life. We strive to set the standard for quality, safety and value in the discovery, development and manufacturing of medicines. Our diversified global health care portfolio includes human biologic and small molecule medicines and vaccines, as well as many of the world's best-known consumer products.

Moderna is a leader in the creation of the field of mRNA medicine. Through the advancement of mRNA technology, Moderna is reimagining how medicines are made and transforming how we treat and prevent disease for everyone. By working at the intersection of science, technology and health for more than a decade, the company has developed medicines at unprecedented speed and efficiency, including one of the earliest and most effective COVID-19 vaccines.

Moderna's mRNA platform has enabled the development of therapeutics and vaccines for infectious diseases, immuno-oncology, rare diseases and autoimmune diseases. With a unique culture and a global team driven by the Moderna values and mindsets to responsibly change the future of human health, Moderna strives to deliver the greatest possible impact to people through mRNA medicines.
